Professional Summary

Dedicated Full Stack Developer known for collaborative problem-solving and the ability to build scalable, high-performance web applications. Adept at translating complex requirements into seamless digital solutions. Passionate about delivering efficient and optimized applications that drive functionality and performance.

Skills

- **Frontend Development:** HTML5, CSS3, JavaScript (ES6+), React.js, Redux Toolkit, Bootstrap, Tailwind CSS
- **Backend Technologies:** Node.js, Express.js, RESTful APIs
- **Database Management:** MongoDB, MySQL
- **Version Control & Tools:** Git, GitHub, Docker, Kubernetes, AWS, Jenkins, Terraform
- **Core Programming:** C, C++, Object-Oriented

Education

Gujarat Technical University

August 2021 - July 2025

BE in Computer Engineering | CGPA: 7.74

Experience

MERN Intern | BuiltUp Technologies

Jan 2025 – Apr 2025

- Built and maintained a Hospital Management System using the MERN stack.
- Worked on user authentication, dashboard UI, and backend APIs for patient records.

Projects

Job Portal Website [Link](#)

- Developed a full-stack job portal platform using React.js, Node.js, Express.js, and MongoDB
- Enabled features like job posting, job search, filtering, and application tracking.
- Implemented authentication and role-based access for job seekers and employers.

MERN Expense Tracker with Docker and Kubernetes [Link](#)

- Developed a full-stack expense tracking application using MongoDB, Express.js, React.js, and Node.js (MERN).
- Containerized both frontend and backend services using Docker for consistent development and deployment environments.
- Deployed the application on a Kubernetes cluster with separate pods for frontend and backend services.

Certifications

- **Introduction to Front-End Development** | Meta
- **Programming with JavaScript** | Meta
- **Deploy Static Website on Azure** | MLSA
- **Exploring Azure and AI Language Studio** | MLSA
